

I extend my heartfelt thanks to organizers of the IV International Theosophical Congress! I am participating in the Congress for the third time and I can say that this splendid event is getting more powerful and substantial every year.

I am encouraged by the fact that foreign participants were involved in topics' discussions thanks to the whole army of interpreters. Frankly speaking, I had an impression that some of foreigners, despite of excess to the Internet, don't have opportunity to associate with soul mates in their countries. At the Congress they had such an opportunity and they were very happy.

As always I am encouraged by selecting of speakers – deep experts of the Theosophical doctrine, gifted thinkers, and men of science. It was fortunate indeed that the Congress attracts academics, who, as far as I know, continue cooperation with theosophical units outside the Congress. This proves one more time the thesis that theosophy and science will go hand in hand in comprehension of multidimensional reality.

It is particularly gratifying that this endeavor has grown in Russian soil. Nowadays, when the world is torn by hot and cold wars, once again Russia has set an example of how we can unite in common work. I caught a glimpse of the preparation to the Congress, and I can say it is a ton of work and almost non-human tension.

That is why I urge all present and future active and not very active participants to help as much as they can this “mighty core”, which organize these useful Congresses!

Georgi Georgievich Khmurkin,

Your Congress is heard all over the world!

Congratulations on your great creative success. And again, the most original things in terms of interpretation were in presentation of Evgeniya Mikchailovna and Vladimir Vasilyevich Yarovoi.

Methodology for the holding of Congress should be studied as an example of high organization, discipline, dedication and open-mindedness. From my heart I thank you for such high work in favor of peace and humankind!

Helena Ivanovna Ilyina,

The round table brought deeper understanding of the third Shloka, new view at this fragment, fantastic discoveries. I am still impressed.

The Congress is a great work! The main work remains hidden. But those things that the Congress gives people, the way Theosophy is moving to masses, to cities, regions, are worth it. Nobody expects it to be easy in future, and we don't know what we will face in future, but if we are together everything is within our reach.

THANKS ALL!

I propose to exchange our opinions after publishing of reports in digital or hard-copy format; this will help to summarize the work of the Congress.

Sergei Nickolaevich Maximov,

I liked the Congress, more than a half of reports were interesting and informative. The level was higher as compared to the majority of conferences, which I happened to visit, including congresses, which had been held in Saint-Petersburg before. I would like to emphasize good work of interpreters and their competence in the theosophical and philosophical area.

Konstantin Zaitsev,

I cannot overemphasize the importance of holding of IV Theosophical Congress at a time of great transition. The research, reflected in reports of thinkers-theosophists from different countries, showed the urgency and vasty deep of works of Helen Blavatskii and heritage of Roerich's family.

I bow down to theosophists who have overcome challenges in organization and holding of this Congress in order to establish the Truth. Special thanks for the birth of unique publishing of magazine "Theosophical vector" – this is the support on all fronts to a man who wants to be a man who started on a path of knowledge.

I am infinitely grateful!

Irina Maligh,

Everything was serious, significant with presentation of profound knowledge!

This is a big event! The most enthusiastic review of the Congress! It's so amazing that foreign speakers presented their practices based on knowledge of theosophy. New discoveries and new ideas... I am so happy and inspired!

Valerii Kuzeev,

Thank you very much!

I would like to participate in the Congress in future too.

Larisa Mazur,
Dzerdginsk

Everything was in one breath. There was no feeling that the Congress is held to a reduced extent. I could feel the fullness of audience. Your hearts, dynamics of holding, all these created the impression of fullness and voluminosity. Evgeniya Mikhailovna is a master of communication, master in everything and besides, she is a charming woman.

As for round table, I liked that an issue was considered from every angle, and, of course, new thoughts, which were born while discussion... It can be seen that as compared with previous Congresses you have some experience. Everything is very good, objectively speaking!

I wish this performance hadn't end. And as one participant of the Congress pointed out, this "river" should break its bank sooner or later and fill the space required.

I bow down before you!

Yurii Butin,
Saratov

Annually the Congress is becoming a holiday for all spiritual seekers. Thanks to all organizers and speakers for excellent event. This brings people, peoples and countries together.

Thank you so much Beautiful Evgeniya for absolutely everything. It was an absolutely beautiful, successful and inspirational day today at the Congress! I enjoyed the speakers, the powerful presentations, the video from behind the scenes, the books, the poetry, the music and especially loved the closing talk from Dylykova Vilena Sanjeevna on the Kalachakra Tantra! Well done ~ everyone!

It was the greatest of honours to be invited to participate in the IV International Theosophical Congress and Scientific Symposium put together by the Adamant Lodge and the Theosophical Society of Russia, bringing dedicated students of Theosophy together from all over the globe. Welcoming and well structured, this year's Congress presented the ancient wisdoms from dedicated Scientists and Theosophists in a successful online interactive platform. The seeds have been planted, it is time they be harvested and we selflessly sow for the generations to come, there is nothing more important to do. "The Secret Doctrine" is the textbook for Humanity.

Again, thank you for all you are and do.

What a brilliant job you are all doing. It is an honor to walk the Path with you!

Anne Kelly,
Brixham, UK

Dear Friends!

Your congress was splendid!

There were on the high-level presentations; specially from St. Petersburg, Moscow and England. I looked part at them again and I have very touched when Vilena Sandjeevna told about 3th Kalachakra's book. The young man told very interested translations from Tibet language. You have done lot of work there. The exhibition was amazing; books, Magazines and Art!

I think that Russia's The Theosophical society is very active, and you have lot of enthusiasm. You have taken seriously to study and investigate. It's good that you have excellent translation.

I have got always great joy and knowledges from your congresses.

This was the brilliance and there was wonderful music.

I have heard that your country's planet is Venus, which is the planet of beauty and art. I can sense it when I have been there and met you (also online).

I wish you good times with wisdom and love.

Thank you very much for your patience and kind.

Let me extend my congratulations to the Congress delegates and I am very happy that such a gathering is taking place in Russia.

I think it is the spiritual journey of every human being to maintain humanity, tolerance and morality at all times. This Congress will be decisive and causal.

Personally, I would like to mention one more thing, I have a special affection and love for Russia. Perhaps it was Russian literature and movies that made me feel that way. Now, especially with a relationship with Theosophy, Russia has become my favorite again.

My heartfelt congratulations once again to all the delegates.

Sreejith Kottol Gobi,
